The **Project Managers Team (PMT)** provides leadership and guidance on the delivery of administrative products and services, and continues to support the established application and data management principles. The group is chaired by the Associate CIO for Administrative Information Services and comprised of managers and project managers from the administrative departments. Additional information can be found at this [LINK](#).

The **Data Governance Steering Committee** provides a structure for campus-wide discussions about protecting Princeton data and for guiding campus initiatives that relate to the use of University information. Membership is comprised of executive-level staff from the Office of Finance and Treasury, Office of the Registrar, Office of the General Counsel, Office of the Dean of the Faculty, Audit and Compliance, Human Resources, Office of the Executive Vice President and Office of Information Technology.

The **Data Management Advisory Group (DMAG)** is focusing on issues of data management as they relate to student, employee, faculty, financial, and health record data. The group is assessing best practices and issues relating to data classification, data sharing, data safeguarding and proper use. The group is chaired by the Deputy CIO for OIT Operations and Planning and membership includes staff from OIT and most administrative departments.

The **Desktop Systems Council (DeSC)** works to standardize the University’s administrative desktop computer environment, with the goal to streamline costs, ensure that a standard administrative computing environment is sustained, and enhance the delivery of administrative systems and productivity tools. The Council is chaired by the Associate CIO for OIT Support Services, and membership includes staff from OIT, the Library, Academic Departments and Facilities.
